WHY TAKYON

Customer First

On Time Delivery

Commitment to social cause

Expertise across all IT Infra solutions

WE UNDERSTAND WE ARE HERE FOR YOU

Extraordinary things happen when Experience & Technology come together! We completely understand your need of having a state-of-the-art IT Infrastructure.

We have years of experience in providing all sorts of IT Solutions to our customers ranging from simplest to the most complex one's.

We ensure unmatched quality and highest level of support services in all the products and services that we offer, that enable 100% client satisfaction.

We aim at proper understanding of our client's requirement so that we can provide them industry benchmarked solutions to meet their needs.

OUR TEAM IS OUR STRENGTH

Our team is the secret that makes us achieve exceptional results

We are proud of the people who make up our team, and believe it is what distinguishes us from the others.

Our dedicated team of skilled and passionate IT professionals include **Hardware Engineers, Service Engineers, Sales and Pre-Sales Staff, Administrative Staff, Software Team, Implementation and Designing Team, Bidding Executives, Customer Support Executives, Testing & Repairing Engineers and Network & Resident Engineers** who always strive to deliver the best quality of work within deadline.

Through collaborative client relationships, we are devoted to provide the highest quality support and customer services. Our skilled experts provide proactive services and professional advice to help you achieve your goals.

With the years of experience and level of technical expertise of our team, you can simply focus on building your business without worrying about the technical aspects.

OUR SOLUTIONS AND SUPPORT

Enterprise Networking

We provide a complete range of network solutions that comprise of world-class quality certified products and services that offers unrivaled performance.

Network Security

We offer high-performance network security solutions for internal segmentation and next-generation firewall. As the leading network security service providers, we assess, test, and fix high-risk security gaps and defects.

AV and Collaboration Solutions

We offer effective Unified Communications and Virtual Collaborations services and Audio-Visual solutions that aids better personalized experiences to the modern workforce.

Security & Surveillance

We hold expertise in providing end-to-end security and surveillance solutions with proper maintenance and support facilities.

Datacenter

Our Datacenter services for Hardware and Software are specialized to meet rapidly changing equipment standards and technological demands.

Cloud and Managed Services

We are proficient in building and managing comprehensive cloud solutions efficiently.

Enterprise Networking

We provide a complete range of network solutions that include world-class quality certified products and services that offers unrivaled performance.

Wired Network

Our expertise in wired networks includes:

- Design, implementation, operation, and maintenance
- Solutions to large campus on Optical fiber and UTP for Voice, data, and video
- LAN Infrastructure Audit and Analysis

Wireless Network

Our wireless solutions include:

- Point to Point and Point to Multipoint Outdoor Wireless network
- Indoor Wi-Fi hotspot for hospitality and public hotspots.
- Campus Wi-Fi Solutions.

WAN

We offer highly secure WAN architectures that are easier to deploy, operate, and manage so that you can work smartly, quickly, and more efficiently.

Software Defined Network (SDN)

Our software-defined network can make your network easily manageable and more flexible. It automates the entire network lifecycle and ensures that the network is always aligned with business needs.

Network Security

We offer high-performance network security solutions for internal segmentation and next-generation firewall. As the leading network security service providers, we assess, test, and fix high-risk security gaps and defects. Our customized and specialized products and services ensure to seamlessly manage and protect your network digitally. We deliver solutions that conduct threat analysis, comprehensive network security reporting, and an intelligent security search to fulfill the security and compliance requirements.

Next-Generation Firewall:

Our next-generation firewalls service delivers five key benefits to organizations:

- Advanced security and breach prevention.
- Visibility over the entire network.
- Flexible management and deployment options for small, medium-sized businesses to large enterprises.
- Fastest detection of threats.
- Automatically shares threat information.

Advance Threat Protection:

We follow a 3-steps strategy for advance threat protection that includes Prevention, Detection and Mitigation.

Through our advance threat protection service, we can automatically detect previously unknown threats and create actionable threat intelligence. Core benefits:

- Comprehensive threat visibility.
- Advanced detection of Malware.
- Decreases false positive.

DDOS (Distributed Denial of Service)

We offer a dynamic, multilayered security solution that protects from both known and zero-day attacks with very low latency.

Key benefits:

- Easy monitoring and facility of instant notification.
- Filter traffic and automatically detects and blocks illegitimate requests and traffic.

End Point Security

We offer protection of computer networks that are remotely bridged to client devices. The connection of laptops, tablets, mobile phones, and other wireless devices to corporate networks creates attack paths for security threats.

Endpoint security attempts to ensure that such devices follow a definite level of compliance to standards.

AV and Collaboration Solutions

We offer effective Unified Communications and Virtual Collaboration services and Audio-Visual solutions that aid better personalized experiences to the modern workforce.

IP Telephony

Our IP telephony solutions provide highly secure, reliable, and scalable communications on your existing LAN/WAN infrastructure. This improves employee agility and productivity through integration with innovative applications.

Video Conferencing

Our video conferencing solutions enable high-quality video meetings that allow integration with existing tools and technology, and workflows for an uninterrupted user experience.

Audio Setup for Meetings and Conferences

We offer a complete range of audio solutions for all types of conference halls and meeting rooms. Our audio setup ensures the communication is crystal clear.

Security & Surveillance

We hold expertise in providing end-to-end security and surveillance solutions with proper maintenance and support facilities.

We have tied up with global giants to provide the latest security solutions under one roof. We have executed major CCTV Surveillance Projects for Police, Defense, Central Government Establishments, Nationalized Banks, Etc.

Whether the requirement is of a simple CCTV system or a comprehensive integrated system, we offer the highest standard end-to-end security solutions.

The Solution Offered includes:

- CCTV Cameras
- IP Surveillance
- Access Control System
- Industry specific Security solutions

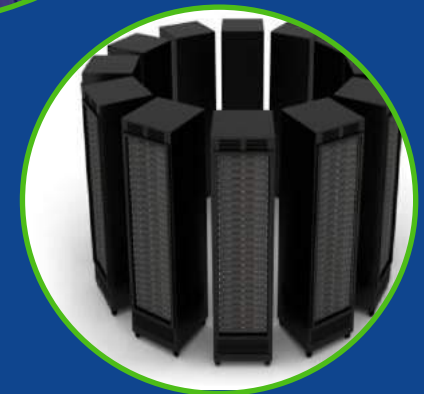

Datacenter

We have a complete range of solutions for computing, data center switching, and security in converged and hyper-converged data center establishments.

Our Datacenter services for Hardware and Software are specialized to meet rapidly changing equipment standards and technological demands. We create simpler and more adaptive datacenters that are capable of fulfilling customers' requirements. Our next-generation data center services offer optimal flexibility that supports future technology.

Top-tier enterprises rely on our dependable datacenter services to interconnect the foundational infrastructure that drives their success.

Cloud and Managed Services

We are proficient in building and managing comprehensive cloud solutions efficiently.

Platform as a service (PaaS)

We offer PaaS services that provide a runtime environment for applications and render development and deployment tools that help developers in quickly Creating web or mobile apps, without worrying about the underlying infrastructure of servers, storage, network, and databases that are required for the development.

Software as a service (SaaS)

We offer comprehensive software solutions which you access over the internet generally on a pay-as-you-go basis. Users can access the software without downloading them on their devices simply through a web browser.

Infrastructure-as-a-service (IaaS)

We provide IT infrastructures i.e., servers and virtual machines (VMs), storage, networks, operating systems on a pay-as-you-go basis.
